PRODUCT FEATURES

- Pulse Width Modulation (PWM) Speed Controller Motor
- Variable Speed Profile can be set to customer/application needs
- >20 KHz Switching Frequency, above human audible hearing range
- Input Frequency can be set to customer/application needs
- Low Quiescent (Sleep Mode) Current Electronics
- Integrated Cooling for Motor and PWM
- PWM has Hermetically Sealed Electronics
- Stall Protection Incorporated
- Over Voltage Protection
- EMI Suppression
- Current Limit Protection
- Thermally Protected Electronics
- Long Life Brushes in Motor
- -40°C to 80°C Ambient Operating Temperatures
- Automatic Low Voltage shutoff so Batteries will not be drained

BLOWER MOTOR WITH PWM CONTROLLER
